Protecting Critical Assets Utilizing Trusted Methodologies and Experts

Sancorp Consulting, LLC (SANCORP) is a government solutions firm that combines established and refined military, intelligence, and business practices with researched academic methodologies to deliver a holistic, systematic approach to solution development.

Our Services

Intelligence & Counterintelligence Solutions

The SANCORP team brings decades of experience in military and federal intelligence and counterintelligence activities in areas such as collection, analysis, and the implementation of robust defensive measures to safeguard classified and sensitive information.

Artificial Intelligence & Machine Learning

SANCORP continues to play a pivotal role in the enablement, adoption, and acceleration of AI/ML across the Department of Defense. Our solutions include subject matter expertise to key stakeholders and clients, and the design, development and implementation of business processes, technical documentation, and architectural diagrams.

Policy and Program Development

SANCORP's team of policy advisors and subject matter experts provide policy and program development and staffing support along with enterprise level coordination to ensure the successful delivery of policy and program development products at the highest levels of government.

Counter-Insider Threat Solutions

SANCORP leverages decades of experience in private industry, national security, and government, especially in research and development to provide a systematic approach to support organizational Insider Threat requirements. Our Team of subject matter experts are trained to design, implement, and maintain enterprise-wide Insider Threat programs, including threat analysis, and robust planning, programming, budgeting, and execution support.

Identity Operations & Activities

SANCORP provides subject matter expertise and technical experts to support biometric access control, media device forensics and exploitation, identity and data intelligence, and identity management requirements.

Cyber & IT Solutions

The SANCORP team is experienced in the safeguarding, safety, and security of new and existing enterprise-wide cyber and IT solution systems within private industry and government agencies. We leverage decades of experience, along with our proven systems to identify potential vulnerabilities to make informed, critical decisions on security and resilience of assets, systems, and networks.
