

March 2022 – SANCORP Consulting, LLC is a recipient of a \$241m, 5-year Data Readiness for Artificial Intelligence Development (DRAID) Basic Ordering Agreement (BOA) in support of the Department of Defense (DoD) Joint Artificial Intelligence Center (JAIC). Thanks to our new partners at Intuitive Research and Technology Corporation (*INTUITIVE*) in Huntsville, Alabama for their partnership and support.

This award allows Team SANCORP to create, acquire, curate, prepare, manage, and secure data sets for use in DoD Artificial Intelligence (AI) models as well as application development, testing, certification, and operation. Team SANCORP will deliver solutions and services in areas such as Project and Program Management, Data Science, Data Engineering, Data Architecture, Data Acquisition and Curation, Data Quality and Analysis, Synthetic Data Generation and Data Anonymization, Software Development, Modification, and Configuration, Enterprise Information Management and Governance, and Cloud Integration and Alignment. The DRAID BOA is SANCORP's third award in the DoD Artificial Intelligence/Machine Learning space which include a \$250m, 5-year blanket purchase agreement (BPA) to provide Test and Evaluation products and support to the DoD and a \$150m, 5-year AI Talent BPA to provide AI/ML services and support to all 43 of the DoD components.

“SANCORP is humbled by this opportunity to continue supporting the JAIC and the DoD with Artificial Intelligence solutions. We are committed to working closely with our partners at *INTUITIVE* to deliver products and services that will give our warfighters the technological advantage they need to defeat America's 21st century adversaries,” said SANCORP President Frank Sanchez.

SANCORP is a government solutions firm headquartered in Falls Church, Virginia with offices in Huntsville, Alabama and Panama City Beach, Florida. SANCORP provides counterintelligence, security, law enforcement, insider threat, identity operations, artificial intelligence/machine learning, and cyber/IT related support to federal clients including the U.S. Marine Corps, U.S. Army, the Under Secretary of Defense for Intelligence and Security, the Federal Bureau of Investigation, and the Department of Defense Joint Artificial Intelligence Center.
