

Sancorp brings decades of technical and non-technical experience from government and private industry in the field of Artificial Intelligence and Machine Learning.

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING SERVICES

Our team includes a cadre of seasoned program and product managers, analysts, engineers, scientists, and enablers such as AI/ML Subject Matter Experts, Data Engineers, Full Stack Software Engineers, Operational Test Engineers, UI/UX Developers, Technical Writers, and Operations Research and Systems Analysts. We support the methodologies and operating procedures necessary to effectively handle day-to-day activities across various client platforms.

Sancorp's Clients

Our clients include the U.S. Department of Defense (DoD), Joint Artificial Intelligence Center (JAIC). The JAIC is responsible for 1—delivering AI-enabled capabilities that address key DoD missions; 2—scale AI's impact across DoD through a common foundation that enables decentralized: development and experimentation; 3—cultivate a leading AI workforce within the DoD; 4—engage with commercial, academic, and international allies and partners; and 5—lead in military ethics and AI safety.

We support the following lines of effort at the JAIC:

- ☛ Threat Reduction and Protection— leveraging AI to assist first responders with information to save lives and protect property.
- ☛ Business Process Transformation—Transforming DoD business processes utilizing AI technologies.
- ☛ Warfighter Health—employing AI technologies to DoD's health data to support medical developments, increase operational readiness and reduce healthcare costs to our military.
